

What is PotashpluS™?

PotashpluS™ is a granular premium potassium fertiliser, specially formulated using a combination of potash and Polysulphate™. It is a multi-nutrient fertiliser providing crops with vital potassium (K) along with sulphur (S), calcium (Ca) and magnesium (Mg) in one application.

Why use PotashpluS™?

- ✓ Efficient single product containing 4 nutrients
- ✓ Contains 19% potassium sulphate and 81% potassium chloride
- ✓ Compacted granule that will spread to 36 metres
- ✓ Fully soluble, with all nutrients available for plant uptake
- ✓ Suitable for all types of soils and all kinds of crops, including high demanding potassium and sulphur crops
- ✓ Extended nutrient availability, reducing risk of sulphate losses through leaching
- ✓ Low carbon footprint, no ammonia emissions and non-acidifying

Origin Fertilisers PotashpluS™ range

Origin Fertilisers can supply PotashpluS™ either as a straight or formulated into a wide range of multi-nutrient NPKS or NKS compounds tailored to all soils and crops.

Advanced nutrition for enhanced performance
